COOL

City of Prospect acknowledges that we are on the traditional country of the Kaurna people of the Adelaide Plains region, and we pay our respect to Elders past and present. We recognise and respect their cultural heritage, beliefs and relationships with the land, and we acknowledge that they are of continuing importance to the Kaurna people living today.

# About our Urban Trees

**City of Prospect is committed to the planting, protection, and management of all our local trees to safeguard and enhance our leafy character for future generations.**

Our beautiful green tunnels (streets lined with trees where their canopies grow to touch across the street) are fundamental to creating a sense of place and increasing health and wellbeing across our city.

Trees look wonderful but also help to cool our streets and suburbs. They provide food and habitat for

local wildlife and help remove carbon that we produce. Most importantly, they improve air quality by removing pollution and they also give us oxygen to breathe.

Currently, there are just over 15,000 trees growing alongside City of Prospect's streets and within our parks and that number is growing every year. Our aim is to plant hundreds of new trees each year, to create more green tunnels, homes for wildlife, and a cooler, happier city for all our residents.

**Explore the City of Prospect's Tree Tags Trail to discover just how cool our trees really are!**

**FUN TREE FACT**  
Trees provide habitat for native wildlife. Can you spot one of our nest boxes in a tree?

## MAKE SURE TO

**Bring along** water, hats and sunscreen to keep you sun safe and a pen or pencil to complete the activities.

**Watch out** for traffic when crossing roads.

**Share photos** of your Tree Trail adventure on social media and tag **@cityofprospect** on your posts.

START

## THE ROUTE

The trail starts at Payinthe and continues east along Flora Tce to Soldier's Memorial Gardens. From there the trail heads south and west to finish in St Helens Park.

Time: 30 mins walking, but leave extra for time to find the Tree Tags, complete the activities in the brochure and enjoy being out in nature.

## CRACK THE CODE

23 of the 30 tagged trees along the Tree Tags Trail hide a secret message!

Visit each of the trees to find the **23 Tree Tags** with a code number and code letter in the top right hand corner.

When you find a code number and letter on a Tree Tag, write the code letter in the numbered square on the next page.

Once you have found all 23 Tree Tags with a code letter, and filled in the boxes in the right order, **you will reveal the secret message!**

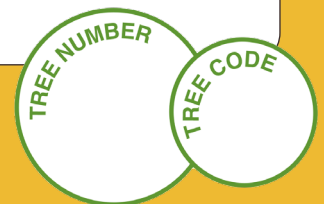

## How to do the Tree Tags Trail

Use the map to find one or all of the **30 trees along the 2km trail.**

Each tree is marked with a **"Tree Tag"** with interesting facts about some of the benefits that tree provides.

You can walk some or all of the trail, it's up to you!

**Enjoy your walk amongst our trees and keep an eye out for our new wildlife nesting boxes in some of our trees!**

# Be a tree trail detective!

## A SEED, NUT OR FRUIT

On the ground or in a tree

## A PERSON

Sitting or playing in the shade

## AN INSECT

Eg. Ant, grasshopper, worm or butterfly

## A TREE

With rough or smooth bark

## A HOME FOR AN ANIMAL

Nest, nest box, or tree hollow

## A BIRD

Flying or sitting in a tree

## A LEAF

Fallen leaf on the ground

## A TREE

One that you can hide behind

What is your favourite tree on the tree trail?  
(Write it below)

FUN TREE FACT  
Tree roots use and store rainwater and help prevent floods
